Profile

I am an enthusiastic and very motivated Frontend Developer currently working as a freelancer on UpWork.

I am a dedicated and hardworking person, who believes in honesty and good working relationships.

I am a self taught programmer, I'm constantly learning, I use the latest technologies, following the best & latest web coding techniques to satisfy every customer.

I learn fast, I work hard and I am determined to do a good job.

Employment History

Freelance Frontend Developer, UpWork

Sep 2020 — Present Remote (from home)

Based on provided designs I developed web application using HTML, CSS and JavaScript. In these projects, I work with:

- JavaScript Frameworks such as Angular, React and Vue.
- CSS Frameworks such as Tailwind and Bootstrap.
- E-Commerce Websites like Shopify

Freelance Frontend Developer-Project Based, Next View Digital Marketing Agency LTD

Jul 2020 — Sep 2020 Remote (from home)

I recreated the Delete Agency blog, using Tailwind CSS and VueJs.

This project is made in HTML, Tailwind CSS, VueJs. It fully preserves the functionality of the original site, having all the active links (it is a complete blog model, with social media links, etc.).

Is a fully responsive, mobile-first website. Subsequently, it was integrated in a CMS (WordPress) and customized according to the client's wishes.

Freelance Frontend Developer-Project Based, Qsite Solutions

Feb 2019 — Aug 2019 Remote (from home)

I worked in 2 projects with them.

On the first project I implemented an application in Angular 7, that was at a later point integrated into a CRM project. This application had 3 modules: one for products, another one for categories and one for invoices. Every section was a fully functional CRUD. The storing of data was flexible: both JSON files and db were supported. For styling I used Bootstrap on this project.

Vue

Angular Material

Git

Leadership

Team management

Languages

English

The second project was a platform dedicated to farmers for business management and selling products on the market. I worked on 2 modules of this project. The project was made in Angular 7, and for the styling we used Angular Material.
